

SNELLENTE 7 NOTTI CREMA EFFETTO CALDO

Slimming 7 Nights Warm Effect Cream is an ultra-intensive treatment which uses the thermotherapy for an effective slimming and draining action in just 7 nights, while sleeping. Its formula contains Marine Polysaccharide and other active ingredients including Integral Salt, rich in trace elements, extract of Brown Seaweed, Sundew extract and Shea Butter that:

- Promote the reduction of fat deposits and help counteract their formation;
- Promote the drainage of excess skin liquids;
- Smoothen and nourish the skin, making it smoother and softer.

Rich cream texture; leaves no residue on the skin.

THERMOTHERAPY exploits the warm effect on the skin by promoting reactivation of the microcirculation, for better absorption of lipolytic principles.

CLINICALLY PROVEN EFFICACY
A controlled clinical study was performed on 50 women with mild to moderate surface adiposity on the hips, thighs and knees:
- Acts on localized fat and on excess fluids with first proven results just in 7 nights*.
- Slimming effectiveness is doubled after 1 month of treatment.
*Slimming: cosmetic remodelling action during use which does not involve weight loss.

HOW TO USE Apply every evening for at least 7 nights on areas to be treated (ex. hips, thighs and knees) massaging with upwards movements. Continue the treatment to enhanced results. It is recommended to perform several treatment cycles during the year.

Warnings External use. After few minutes a warm and/or slight itching sensation may be felt, and the skin may become temporarily red. These reactions, like these are temporary, they are a sign of cosmetic activity. Wash hands carefully after use. Do not apply the product on irritated or injured skin. Avoid contact with eyes or mucous membranes.
